#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. **The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided.** The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because line 1, "The present invention recites a an exercise" should read --An exercise--. Correction is required.

See MPEP § 608.01(b).

3. Claim 9 is objected to because of the following informalities: "10" should read --1--. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

- a. Claims 1-4 and 13 are rejected under 35 U.S.C. 102(a) as being anticipated by Parmater. Parmater discloses an apparatus having a back support member with a first side (50-fig. 1), a headrest having a first side (52)

and a means for supporting a neck and head of the user (58). Regarding the language "for use in performing abdominal exercises", "for supporting a back of a user", "for resting a head of a user there against and", "wherein when a user performs an abdominal exercise, said supporting means supports said headrest thereby preventing neck and cervical strain" has not been given patentable weight because the limitations are purely functional in nature and do not recite any structure. As to claim 2, the device further comprising a cradle (54) connected between the supporting means and headrest. Regarding the language "for providing additional neck support and comfort to the user" has not been given patentable weight because the limitations are purely functional in nature and do not recite any structure. As to claim 3, further comprising means for adjusting the supporting means (62,64). Regarding the language "for provided by said supporting means" has not been given patentable weight because the limitations are purely functional in nature and do not recite any structure. As to claim 4, the supporting means is a spring (fig. 1). As to claim 13, comprising at least one handle (38) pivotally connected to the back support. Regarding the language "for providing stability during abdominal exercises" has not been given patentable weight because the limitations are purely functional in nature and do not recite any structure.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3764

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

b. Claims 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Parmater as applied to claim 1 above, and further in view of Gehrke.

Parmater discloses all of the limitations of the claimed invention except for telescopic support legs. Thus Gehrke teaches telescopic support legs (fig. 1-16). It would have been obvious to one having ordinary skill in the art at the time the invention was made to include adjustable legs on the device of Parmater in view of the teaching of Gehrke such that legs are capable of being configured to adapt to a variety of different sized users utilizing the device.

***Allowable Subject Matter***

6. Claims 5-12 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
